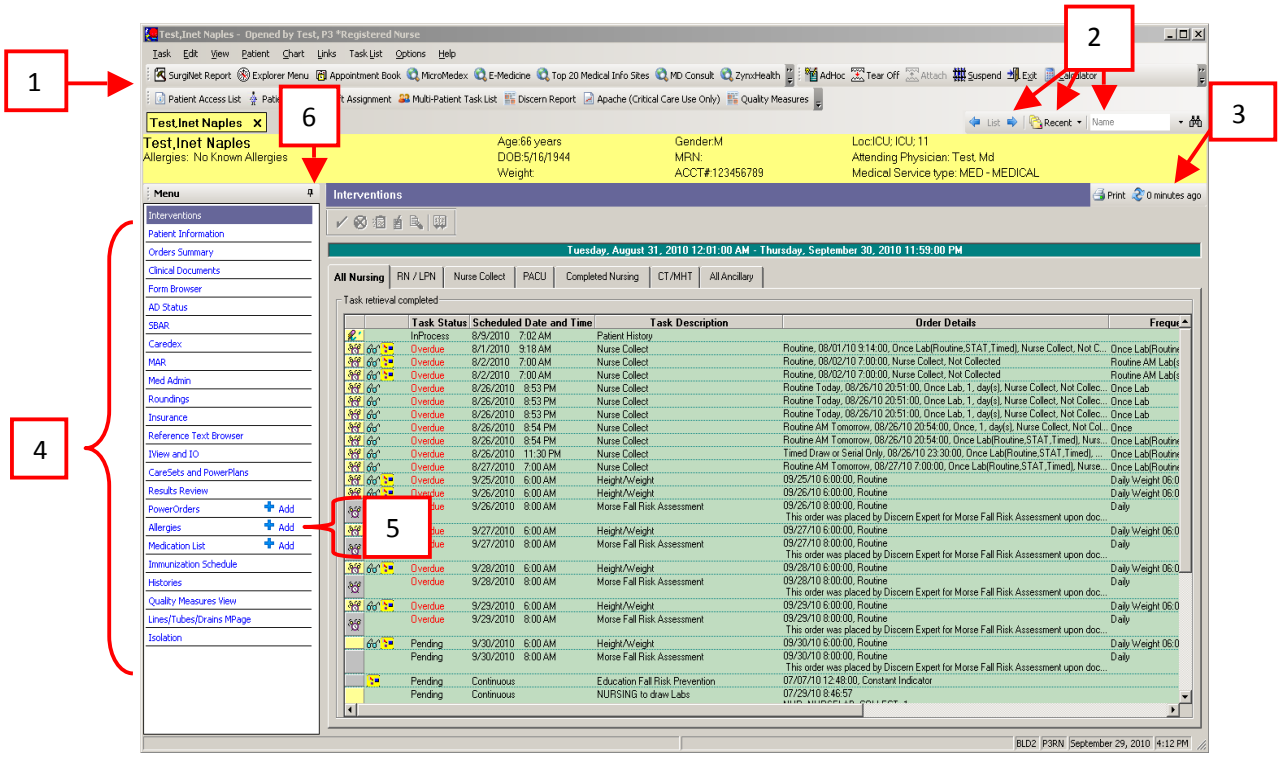
PowerChart Enhanced View (Physician Overview) – Coming October, 17



1. An enhanced tool bar with both icons and titles, providing quick access to other applications, web sites, or patient lists.

2. Locator Tools: Three tools to locate and open a patient chart:
   a. List Button.    b. Recent Button    c. Name Search

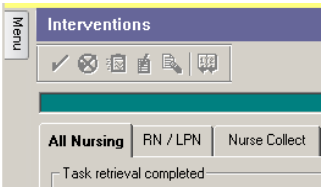
3. A new and improved Refresh Button that now shows how long it has been since last current page refresh.

4. Menu or Table of Contents (TOC): The TOC replaces the tab system previously located across the top of a patient's chart. The TOC is designed for easier chart navigation and is collapsible (see below).

5. Three sections now include an Add feature: This takes you directly to the Add Order, Add Medication Order, or Add Allergy windows.

6. Click the Pushpin icon on the right edge of the TOC to "unpin" (collapse or minimize) the TOC display. Once collapsed, the TOC will appear as a Menu tab.



1. Hover over the Menu tab to maximize the TOC.
2. Access any Chart component by selecting it within the TOC.
3. To Pin the TOC back into permanent view, click the sideways Pushpin.

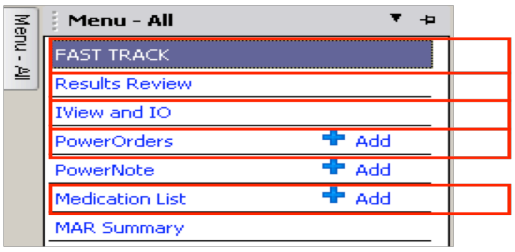
New Content in PowerChart:

1) Some Tab names have changed. The following maps the new TOC names to the original tab names.



FAST TRACK is **Inpatient Summary**

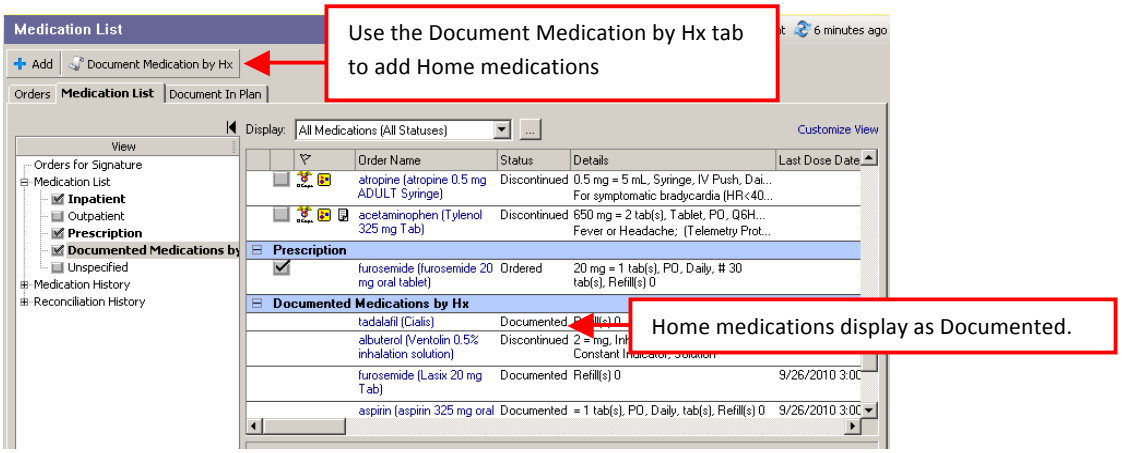
Results Review is similar to **Flow Sheet**

IView and IO is **Intake and Output**

PowerOrders is **Orders**

Med List is replacing **Medication Profile**

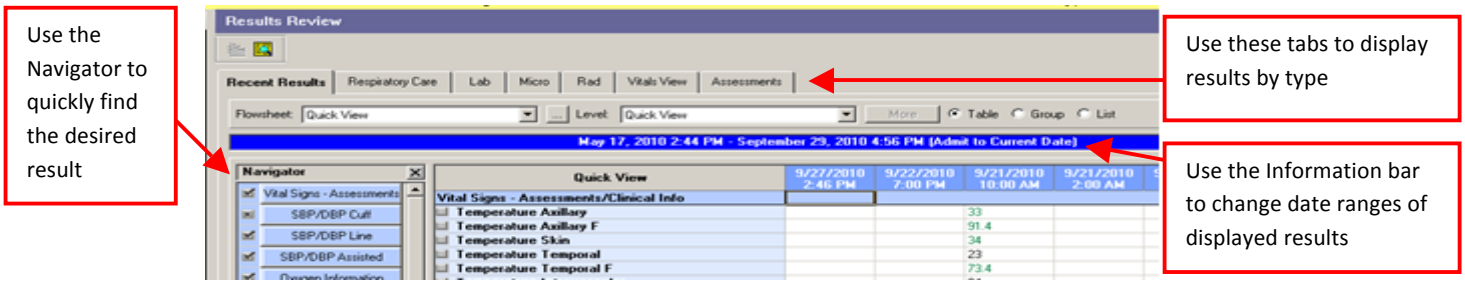
2) The Medication List can be used to quickly document and view a patient Home Medication History.



3) Histories Use this section to view and modify a patient's past medical, surgical procedures, and social histories.

4) Lines/Tubes/Drains MPage This section shows all active and discontinued Lines, Tubes, and Drains.

5) Results Review Access this section to view all patient results and assessment.



Summary of Enhancements

- PowerChart Enhanced View includes a new Table of Contents, Results View, and easier navigation
- I/O has ability to trend/graph
- Medication List to view historical meds, viewable from the Order Profile
- History section providing overall summary of past medical, surgical and social histories
- Quick-add options to reduce the number of clicks to place an order or add a PowerPlan
- Documented weight now displays in the demographic banner in addition to the flow sheet for trending
- FirstNet Enhanced View includes pending statuses, pre-arrival information and new report capabilities
- ED ExitWriter patient education will be replaced by ExitCare with more content in English and Spanish
- Vitals Signs and Hemodynamic data will automatically chart in PowerChart from GE monitors in ICU
