

INFANT CPR ANYTIME KIT

Would you know what to do if an infant in your care suddenly began to choke or suffer cardiac arrest? You would want to be armed with the skills to save that precious new life. Now – in just 22 minutes – you can learn how to perform lifesaving CPR and relieve choking in an infant with a personal CPR kit. We call this revolutionary kit *Infant CPR Anytime*.

[What is Infant CPR Anytime?](#)

It's the newest addition to the American Heart Association's line of CPR Anytime products. *Infant CPR Anytime* allows families, friends, grandparents, siblings and others caring for infants to learn the core skills of infant CPR and relief of choking in just 22 minutes. Developed in coordination with the American Academy of Pediatrics (AAP) and using the learning technology of Laerdal Medical, the kit contains everything needed to learn infant CPR and relief of choking. Learn more about what's included in the kit.

[How does Infant CPR Anytime work?](#)

Infant CPR Anytime uses the same unique method for teaching the basics of CPR as Family & Friends CPR Anytime, the American Heart Association's unique "practice-while-watching" technique. Users practice CPR on a personal manikin while watching these skills being taught and performed on a DVD. Learn more about this research-proven method.

[Infant CPR Anytime - A Lifesaving Tool for New Parents](#)

Every new parent should have the peace of mind of knowing they're prepared to save their infant's life. Infant CPR Anytime can provide that peace of mind. Interested in learning how you can start or help champion an Infant CPR Anytime program? We have many tools to help you started.
